Experience fascinating history and enjoy a fine selection of wines during a guided visit through Hambach, the cradle of German democracy! Follow me through the narrow streets of the old town, passing beautiful wine-growing estates that will open their doors for us...

“Culture, Wine and History: A pleasant stroll through the narrow streets of Hambach, the village below the famous castle – enjoying samples of local wine at historic estates”

Hambach is famous in Germany for its castle, known as the cradle of German democracy. It was where in 1832, people hoisted the German flag of black, red and gold for the first time, during a protest march with more than 25.000 men and women who fought for civil rights and a modern, liberal and unified Germany. It was an unprecedented event in German history and is known to every school child.

However, this is only one of the interesting aspects of Hambach. Starting at Roman times and going on into the Middle Ages, you will be fascinated by the history of the region that evokes multiple facets of German and European history.

Strolling through old Hambach, we will enter the beautiful backyards of centuries old wineries to taste typical wines – white and red – of the local vintners. You will experience how good wine and culture go together!

Please do not hesitate to contact me for customized offers for groups. Available in English, German, French and Spanish.
